

MediaCast® Video Presence

"Get Personal"

MediaCast Video Presence revolutionizes customer service and support with intelligent video call routing and live 2-way, face-to-face video conversations between customers and remote agents.

MediaCast Video Presence

MediaCast Video Presence extends the capabilities of interactive digital signage by enabling a customer to have a live, 2-way face-to-face conversation with a remote expert. Delivering the world's first intelligent, cloud-based video call routing solution, MediaCast Video Presence delivers a truly unique and innovative level of personal interaction.

- Live, 2-way , Face-to-Face Video Telepresence – provides highest level of service and support with a personal touch
- Intelligent Video Call Routing - connect customers to the right expert based on viewer interactions and on-screen selections
- Extensible Agent "Hunt Groups"– assign agents to defined "hunt groups" logically mapped to characteristics such as product expertise, language, or specific offerings
- Cloud-based Software as a Service (SaaS) solution – no software to configure, highly secure, scales as needs grow
- Flexible Agent Control – agents can go "off line" and place video calls on hold
- Agent Call Analytics – log files capture call time and duration
- Integrated with MediaCast CMS (Content Management System) - for content and playlist delivery and management
- Monitoring, Alerts and Reports – complete log files and reports on media assets played or customer interaction "touch points," via CMS
- Works with MediaCast Video Presence-certified Players and CMS systems

MediaCast Video Presence adds intelligent video call routing to interactive digital signage solutions enabling live 2-way video conversations when and where they are needed most.

MEDIATILE ADVANTAGES

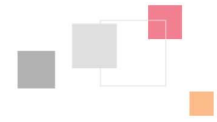

- **PERSONAL, RELEVANT & ENGAGING:** With our MediaCast *personal advantage* you can create and deliver a highly engaging and relevant experience for your viewers. Improve your communication effectiveness and achieve your ROI/ROO goals in record time with record results.
- **EASY TO USE:** Our cloud-based MediaCast Systems give you complete, secure and scalable control right from your web browser. Easily create or access internet content then schedule the right playlists to the right place and time all remotely through the cloud.
- **SIMPLE TO DEPLOY:** Our cloud-connected media players, all-in-one displays and kiosks make deploying and operating a network amazingly simple, flexible and secure. With 3G/4G cellular *just add power™*, or connect to on-site LAN or Wi-Fi.
